

TripUp

Mobile App Redesign

Streamlining the group travel experience
through collaborative planning and real-time social dynamics.

The Challenge & Vision

Friend trips are great.
Organizing a friend trip? Less great.
Deciding where to go, explore, and keep everyone in the loop—can get frustrating, fast.

That's why **TripUp** was created: an all-in-one platform for organizing seamless group travel. whether it's a weekend getaway or a music festival abroad.

Users can collaboratively build itineraries. vote on decisions. and settle expenses—reducing planning friction and amplifying the fun.

User Insights

01 PROFILES

THE ORGANIZER

Typically the **most proactive member**. They set up the trip, invite others, and keep things moving.

THE PARTICIPANTS

Wants to be involved without being overwhelmed. They **suggest ideas**, **vote** on decisions, and stay informed.

THE FOUNDATION

Architecting for **Maximum Simplicity**.

02 PATTERNS

SPONTANEOUS DECISIONS

Most choices happen on the fly, especially mid-trip. The app must support **quick interactions**.

SHARED OWNERSHIP

Everyone wants input. Particularly on food and expenses. A **collective voice** is essential.

LOW FRICTION

If something takes more than a few taps, users switch to WhatsApp. **Intuitive logic** is key.

CONTEXTUAL GOAL

Rapid Decisions via diverse displays.

03 NEEDS

POLLS OVER CHATS

Users prefer **quick polls** rather than chats, as long as the experience is intuitive.

EXPENSE TRACKING

Easy ways to **manage and settle group expenses** via digital methods or in-app payments.

REAL-TIME FEEDBACK

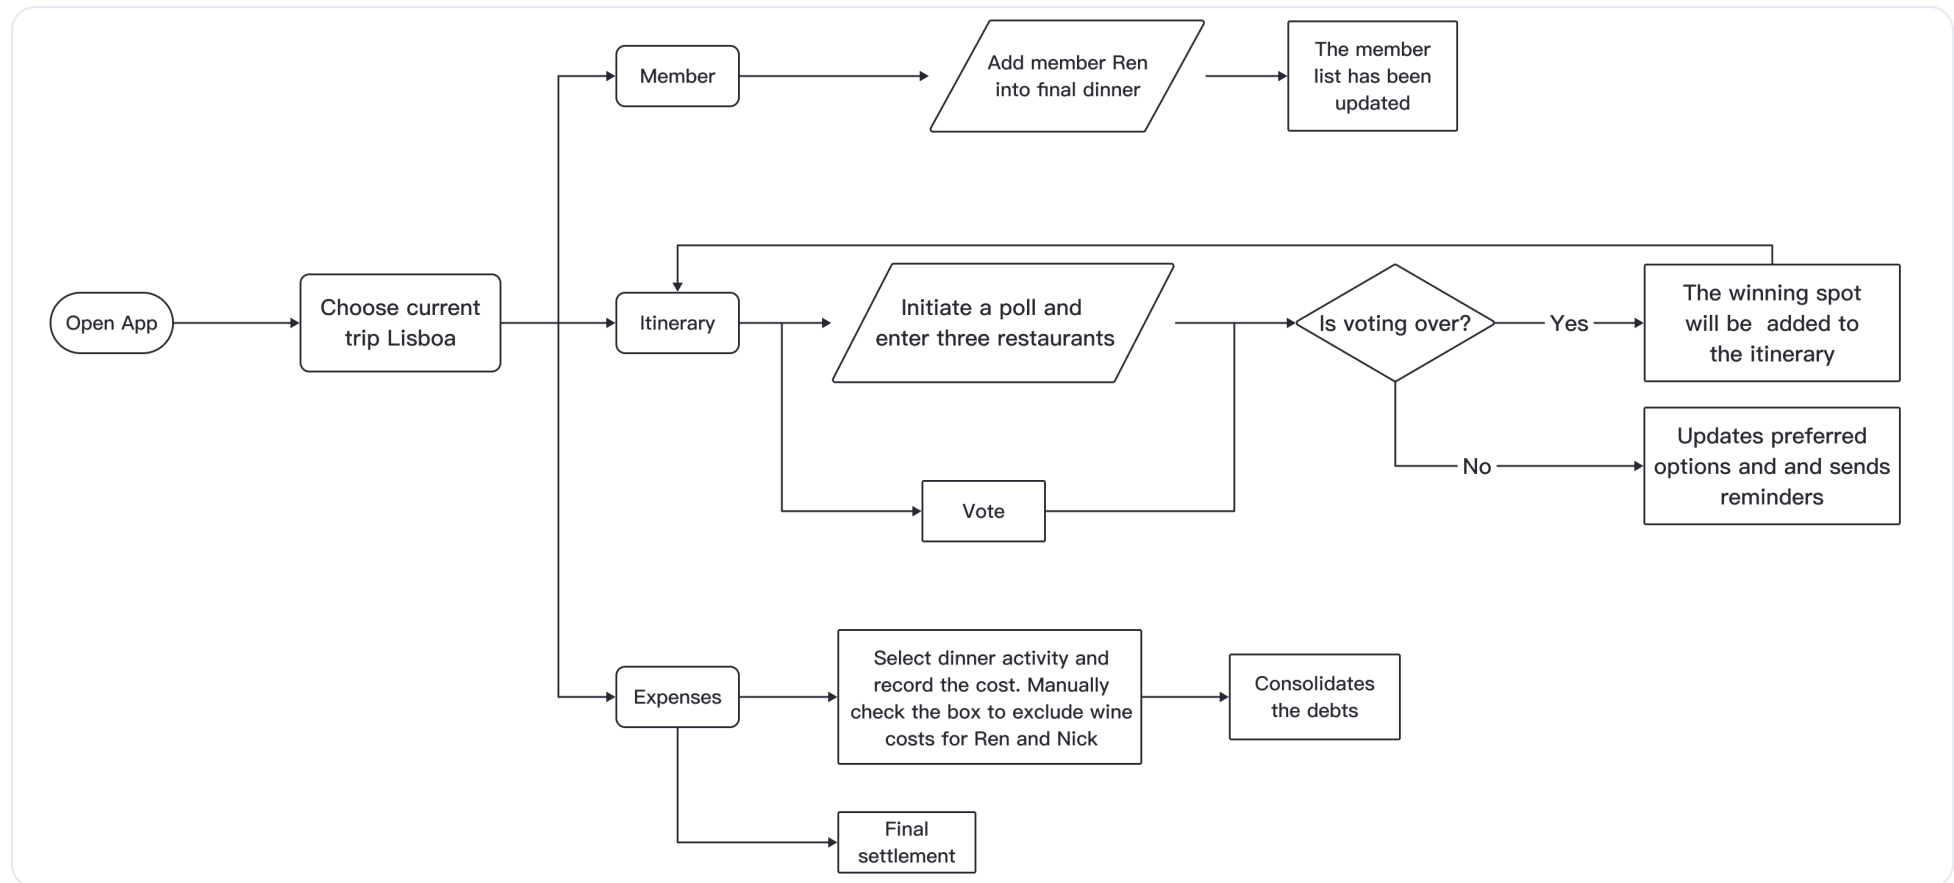

When decisions are made, users expect **instant updates** in the shared itinerary.

USER PRIORITY

Interactive **Status Sync** and Payment.

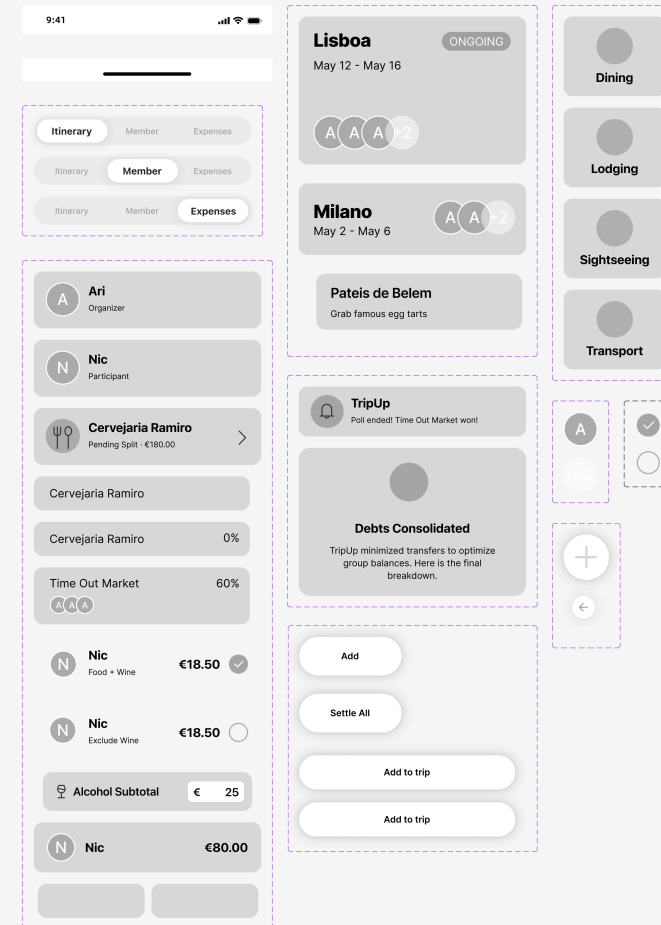

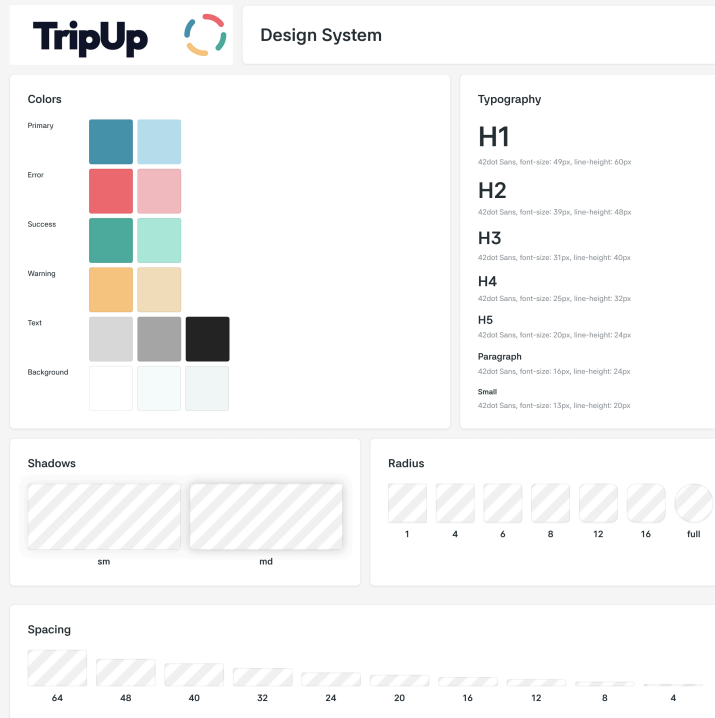

Scenario Logic Flow

This flowchart visualizes the end-to-end user journey, from initiating a quick group dinner poll to concluding with a frictionless expense settlement. By translating abstract user needs into concrete, actionable interface events, it maps out a seamless and intuitive functional flow.
